```java
 1 package chapter07.exercise;
 2
 3 public class Student extends Human {
 4     private String major;
 5
 6     public Student(String name, int age, String major) {
 7         super(name, age);
 8         this.major = major;
 9     }
10
11     public String getMajor() {
12         return major;
13     }
14
15     public void setMajor(String major) {
16         this.major = major;
17     }
18
19     public String toString() {
20         return super.toString() + ", 전공:" + major;
21     }
22 }
```
